SUMMARY

Frontend Engineer with 4+ years of experience in JavaScript and TypeScript, specializing in React.js, Next.js, and React Native. Proven track record of building scalable, user-friendly web and mobile applications. Skilled in state management (xState, Redux, Zustand), dynamic form generation (React JSON Schema Form), and WordPress development, including custom plugin creation for seamless content management. Passionate about clean code, best practices, and delivering seamless digital experiences.

PROFESSIONAL EXPERIENCE

Frontend Developer

Orbit Tech Solution | Apr - Jul 2025

Real-World Asset (RWA) Investment Platform

- Developed a sophisticated dashboard using **Next.js**, integrated with tokenized asset data and crypto wallet features via **MetaMask**.
- Implemented data visualizations using **Recharts** for user asset performance and marketplace trends.
- Integrated **Zoho Sign** to enable secure digital document signing for asset agreements and contracts.
- Managed global state using **Zustand**, with form validation handled via **Zod** and data fetching through **React Query** and **Axios**.
- Applied **shadcn/ui** and **Tailwind CSS** to deliver a clean, responsive UI.

Golf Fairway System Web App

- Built an end-to-end golf course management system for player tracking, tournament organization, and real-time scoreboard updates.
- Used **Google Maps API** for live course visualization and location-aware features.
- Architected a modular dashboard with dynamic data views, leveraging **Recharts** for performance stats.
- Utilized **Next.js**, **Zustand**, and **React Query** to ensure fast, scalable frontend performance.
- Styled with **Tailwind CSS** and **shadcn/ui** for a modern and intuitive user experience.

Key Achievements:

- Delivered two production-ready applications within a tight timeline, each solving complex domain problems.
- Improved user experience for asset investors and golf course managers through responsive UI and real-time functionality.
- Demonstrated ability to integrate third-party services (MetaMask, Zoho, Google Maps API) into complex, stateful UIs.

Tech Stack: Next.js, Zustand, Tailwind CSS, Recharts, Zod, React Query, Axios, shadcn/ui, Google Maps API, MetaMask, Zoho Sign.

Frontend Engineer

Hijra Bank | May 2022 - Feb 2025

- Developed MUAP Generator and Risk Review Generator using Next.js, leveraging xState for state management and React JSON Schema Form for dynamic form generation.
- Streamlined document generation and risk review processes for RM and Risk Analyst staff.
- Contributed to the Hijra Home feature using React Native, enhancing the home-buying experience for users.
- Built the Sedekah Regular feature for Hijra mobile apps, enabling users to set up recurring donations seamlessly.
- Created and maintained internal tools (e.g., Salman) for admin management of the Sedekah feature, ensuring smooth data flow between backend and mobile apps.
- Utilized Storybook to manage and document reusable components and screens, improving development efficiency and consistency.
- Maintained the Hijra official website (built on WordPress) for the financing business.
- Designed and developed 3 landing pages for financing products, ensuring a seamless user experience.
- Developed a custom WordPress plugin to enable admins to edit and customize landing page content without developer intervention.
- Mentored Junior Frontend Engineer.

Key Achievements:

- Improved operational efficiency for RM and Risk Analyst staff through automated tools.
- Enhanced user experience for potential homeowners and donors through Hijra Home and Sedekah Regular features.
- Streamlined content management for the financing department by developing a custom WordPress plugin.

Tech Stack: Next.js, React Native, xState, React JSON Schema Form, JavaScript, TypeScript, HTML, CSS, Storybook, WordPress, PHP.

Junior Web Developer

Cindrum | June 2021 - April 2022

- Developed cryptocurrency platforms, including exchange and wallet websites, specializing in frontend development.
- Assisted in designing UI/UX and translating it into a Vue-based project.

Key Achievements:

- Contributed to the development of secure and user-friendly cryptocurrency platforms.

Tech Stack: Vue.js, JavaScript, HTML, CSS.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, HTML, CSS, PHP
 - **Frameworks & Libraries:** React.js, Next.js, React Native, Node.js, Express, Tailwind CSS, Mantine UI, xState, Redux, React JSON Schema Form
 - **Developer Tools:** Git, Docker, AWS, MongoDB, Cypress, Storybook
 - **Software & Platforms:** Jira, Confluence, Figma, WordPress
-

EDUCATION

Bachelor of Science in Computer Science

University of the People | Expected Graduation: 2028
Currently pursuing a degree in Computer Science.

LANGUAGES

- **Indonesian:** Native
 - **English:** Professional Proficiency
