SUMMARY

Software Engineer with 5+ years of professional experience building production web and mobile applications, with deep expertise in JavaScript, TypeScript, React.js, and Next.js. Experienced in full-stack development using Next.js API Routes/Route Handlers, Node.js, Express.js, REST APIs, authentication and authorization, and database-backed applications. Strong background in fintech, banking, enterprise dashboards, and complex business workflows. Currently expanding backend engineering expertise with Go, focusing on scalable APIs, concurrency, database design, and production-ready backend architecture.

PROFESSIONAL EXPERIENCE

Frontend Developer

Quickbill Indonesia | November 2025 – August 2026

- Develop and enhance the Quickbill platform (quickbill.id) by delivering scalable frontend features and improving the overall user experience.
- Built a comprehensive **Payment History** module covering **Pay-In, Pay-Out, and Withdrawal** transactions, enabling users to efficiently monitor financial activities.
- Developed **Bulk Invoice Creation** features for both **Pay-In** and **Pay-Out** workflows, significantly improving operational efficiency for business users.
- Led multiple **UI revamp** initiatives across both the customer-facing application and internal back-office system to improve usability, consistency, and visual design.
- Develop and maintain **Quickbill UI**, the company's internal component library, ensuring reusable, scalable, and consistent UI components across projects.
- Built and enhanced back-office features to simplify user onboarding, configuration, and system administration.
- Currently developing **Quickbill's mobile application** using **Flutter**, contributing to a unified cross-platform user experience.

Key Achievements

- Delivered critical frontend features for a fintech platform serving **3,000+ active business users**.
- Contributed to a platform processing **over IDR 500 billion in monthly transaction volume**, ensuring reliability, performance, and a seamless user experience.
- Successfully launched major features including **Payment History** and **Bulk Invoice Creation**, improving operational efficiency for finance and operations teams.

- Led UI modernization initiatives across the customer application and internal back-office, improving usability, consistency, and maintainability through a reusable internal component library (**Quickbill UI**).
- Expanded product capabilities by contributing to both **web** and **Flutter mobile applications**, enabling a consistent cross-platform experience.

Tech Stack: Next.js, React, React Query, Jotai, Tailwind CSS, Flutter, TypeScript.

Frontend Developer

Orbit Tech Solution | Apr - Jul 2025

Real-World Asset (RWA) Investment Platform

- Developed a sophisticated dashboard using **Next.js**, integrated with tokenized asset data.
- Implemented data visualizations using **Recharts** for user asset performance and marketplace trends.
- Integrated **Zoho Sign** to enable secure digital document signing for asset agreements and contracts.
- Managed global state using **Zustand**, with form validation handled via **Zod** and data fetching through **React Query** and **Axios**.
- Applied **shadcn/ui** and **Tailwind CSS** to deliver a clean, responsive UI.

Golf Fairway System Web App

- Built an end-to-end golf course management system for player tracking, tournament organization, and real-time scoreboard updates.
- Used **Google Maps API** for live course visualization and location-aware features.
- Architected a modular dashboard with dynamic data views.
- Utilized **Next.js**, **Zustand**, and **React Query** to ensure fast, scalable frontend performance.
- Styled with **Tailwind CSS** and **shadcn/ui** for a modern and intuitive user experience.

Key Achievements:

- Delivered two production-ready applications within a tight timeline, each solving complex domain problems.
- Improved user experience for asset investors and golf course managers through responsive UI and real-time functionality.
- Demonstrated ability to integrate third-party services (Zoho, Google Maps API) into complex, stateful UIs.

Tech Stack: Next.js, Zustand, Tailwind CSS, Recharts, Zod, React Query, Axios, shadcn/ui, Google Maps API, MetaMask, Zoho Sign.

Frontend Engineer

Hijra Bank | May 2022 - Feb 2025

- Developed MUAP Generator and Risk Review Generator using Next.js, leveraging xState for state management and React JSON Schema Form for dynamic form generation.
- Streamlined document generation and risk review processes for RM and Risk Analyst staff.
- Contributed to the Hijra Home feature using React Native, enhancing the home-buying experience for users.
- Built the Sedekah Regular feature for Hijra mobile apps, enabling users to set up recurring donations seamlessly.
- Created and maintained internal tools (e.g., Salman) for admin management of the Sedekah feature, ensuring smooth data flow between backend and mobile apps.
- Utilized Storybook to manage and document reusable components and screens, improving development efficiency and consistency.
- Maintained the Hijra official website (built on WordPress) for the financing business.
- Designed and developed 3 landing pages for financing products, ensuring a seamless user experience.
- Developed a custom WordPress plugin to enable admins to edit and customize landing page content without developer intervention.
- Mentored Junior Frontend Engineer.

Key Achievements:

- Improved operational efficiency for RM and Risk Analyst staff through automated tools.
- Enhanced user experience for potential homeowners and donors through Hijra Home and Sedekah Regular features.
- Streamlined content management for the financing department by developing a custom WordPress plugin.

Tech Stack: Next.js, React Native, xState, React JSON Schema Form, JavaScript, TypeScript, HTML, CSS, Storybook, WordPress, PHP.

Junior Web Developer

Cindrum | June 2021 - April 2022

- Developed cryptocurrency platforms, including exchange and wallet websites, specializing in frontend development.
- Assisted in designing UI/UX and translating it into a Vue-based project.

Key Achievements:

- Contributed to the development of secure and user-friendly cryptocurrency platforms.

Tech Stack: Vue.js, JavaScript, HTML, CSS.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, HTML, currently learning Go
 - **Frameworks & Libraries:** React.js, Next.js, React Native, Node.js, Express, Tailwind CSS, Mantine UI, xState, Redux, React JSON Schema Form
 - **Backend:** Next.js API Routes / Route Handlers, Node.js, Express.js, REST APIs, server-side application logic
 - **Data & State:** PostgreSQL, MySQL, Prisma, React Query, Zustand, Jotai, Redux, xState
 - **Developer Tools:** Git, Docker, AWS, MongoDB, Playwright, Storybook
 - **Software & Platforms:** Jira, Confluence, Figma, WordPress
-

EDUCATION

Bachelor of Science in Computer Science

University of the People | Expected Graduation: 2028
Currently pursuing a degree in Computer Science.

LANGUAGES

- **Indonesian:** Native
 - **English:** Professional Proficiency
